

CALL FOR PAPERS

Abu Dhabi School of Management invites you to submit your short or full length article to:

The 2026 International Conference on Artificial Intelligence Management and Trends (ICAIMT) in Abu Dhabi, UAE.

April 22-23 2026

International Conference on Artificial Intelligence Management and Trends

Strategic AI Leadership

- Developing an AI vision and roadmap
- Leading AI transformation in organizations
- Bridging the gap between AI strategy and execution
- Building AI-savvy leadership teams
- Navigating the AI landscape: Opportunities and risks
- Leadership challenges in AI adoption and change
- AI-driven cultural transformation in organizations

AI Management

- AI implementation strategies for enterprises
- Managing AI projects and teams
- AI's role in decision-making and business intelligence
- Organizational readiness for AI adoption
- AI maturity models and frameworks
- AI training and reskilling for employees
- Measuring ROI and performance of AI systems
- AI management tools and platforms

AI Governance and Ethics

- Designing ethical AI frameworks
- Transparency and accountability in AI systems
- Bias and fairness in AI algorithms
- Global AI regulations and compliance
- Trust-building strategies in AI adoption
- AI's role in upholding societal and cultural values
- Risk management and governance in AI deployments
- Ethics of autonomous and self-learning systems

Generative AI in Business

- Applications of generative AI in industries
- Ethical challenges and misuse of generative AI
- Generative AI tools for content creation
- Integrating generative AI in customer service
- Exploring large language models and their potential
- Impact of generative AI on creativity and intellectual property
- Real-world case studies of generative AI deployment
- Future trends in generative AI technologies

AI-Driven Innovation in Emerging Markets

- Role of AI in fostering innovation ecosystems
- AI as a driver of product and service innovation
- AI-powered innovation in R&D
- Disruptive AI innovations transforming industries
- Collaborative innovation with AI and human teams
- AI-driven startups: Success stories and lessons learned
- Building innovation pipelines with AI insights
- Overcoming barriers to AI innovation adoption
- AI in Finance, Education, Healthcare, Sales, Marketing, HR, SCM

AI Algorithms and Applications

- Innovations in machine learning algorithms
- Real-world applications of deep learning
- Natural language processing (NLP) in practice
- Computer vision for industrial and societal needs
- Reinforcement learning and its use cases
- Edge AI: Algorithms for resource-constrained devices
- Hybrid AI models combining multiple techniques
- AI for big data processing and analytics

IMPORTANT DATES

JANUARY 30 2026 FEBRUARY 20 2026
Paper submission deadline
